Lighthouse Club International Construction Conference Opportunities and Challenges for the Construction Industry in Hong Kong and Overseas HKCEC – 30th May 2019

Introduction

Lighthouse Club International is delighted to present this Construction Conference entitled “Opportunities and Challenges for the Construction Industry in Hong Kong and Overseas”. This Conference will cover a number of important topics which are currently providing both opportunities and challenges for all participants in the construction industry.

This will be of particular interest to all those who participate in the construction industry both in Hong Kong and elsewhere. Whatever their role, all construction professionals will be faced with challenges, whether that be in relation to the health and safety of personnel under their supervision on site or potential defects in designs causing safety hazards and rectification work or risk of claims and disputes through poor contract documentation or poor contract administration or such other pitfalls inherent in any construction project. Such challenges are being met with opportunities through initiatives such as BIM, NEC and other collaborative initiatives to improve performance.

In addition to the opportunity for those attending of sharing new ideas in improving the performance of the construction industry, this conference will provide:

- unique networking and marketing opportunities for developers, contractors, subcontractors, suppliers, consultants, lawyers, trade associations, professional institutions and individuals within and associated with the construction industry; and
- continuing professional development opportunities for individuals who need to further develop their capabilities in order to be better prepared to deal with the global economic challenges faced by the construction industry, through increased efficiency, innovation and motivation.

The Lighthouse Club Charity

The proceeds from this Lighthouse Club Conference will directly benefit **the Lighthouse Club Asia Pacific Region Benevolent Trust** which is devoted to:

- relieving poverty and financial need suffered by persons employed or formerly employed within the construction industry in the Asia Pacific region and the dependants of such persons, where such persons, widows, widowers, children and dependants are suffering hardship as a result of accident, disability or ill-health;
- providing or assisting with the provision and advancement of education for persons employed or formerly employed within the construction industry in the Asia Pacific region, and the dependants of such persons, where poverty is preventing such persons and dependants from fulfilling their education; and
- providing or assisting with the provision and advancement of education, being education and training in the construction industry, for persons who are resident in the Asia Pacific region and who desire to obtain such education and training, but where poverty is preventing such persons from fulfilling such education and training.

Organization

The Lighthouse Club Hong Kong Branch is proud to organize this conference on behalf of Lighthouse Club International.

Lighthouse Club International Construction Conference
Opportunities and Challenges for the Construction Industry
in Hong Kong and Overseas
HKCEC – 30th May 2019

Conference Programme

15:00 Legal Case Study 2
15:30 Tea Break
16:00 Legal Case Study 3
16:30 Legal Case Study 4
17:00 Q&A / Panel Discussion

Breakout Session No. 2

– Safety Workshop featuring:

- Beyond Behavioural Safety to Active Engagement
- OHSW processes, procedures and people: the role of digital technologies

In this workshop, the Lighthouse Club Safety Committee will explore new approaches being adopted to build trust, respect and mutual understanding to create a harmonious and safe working environment. Workshop participants will hear from both local and international experiences and will compare how social and cultural factors impact safety climate.

The workshop will also explore how technology and digitalization is assisting to engage workers at the very front line with innovative and engaging forms of communication eliminating the need for classrooms and therefore increasing efficiency.

Breakout Session No. 3

– Integrating BIM into NEC4 – BIM Workshop from a Contract Perspective:

focusing on delivery of beneficial business outcomes to asset owners/operators, clients, their supply chains and those involved in project funding, including increase of opportunity, reduction of cost through the production and use of asset and project information models.

Facilitated by BKAAsiaPacific & BIM Academy

- 17:15 Feedback from Breakout Sessions 1, 2 and 3
(all together in main hall)
